This highway will cover the following section : **Gurgaon – Kotputli - Jaipur section of NH-8 from KM 42.70 to KM 273** in the state of Haryana / Rajasthan to be executed on BOT basis on Design, Build, Finance and Operate pattern under NHDP Phase-V and its ancillary facilities including Toll Plazas, connecting roads, buildings, commercial premises, hoardings, electric fittings, drains, waterways, water-pipes, telephone lines (the Project) and to change and collect tolls, fees, cess, rents from the users of the Project”.

Distances of toll stations from Delhi are Sahajahanpur - 115 km. No. of lanes at toll stations are Sahajahanpur – 18 lanes.

## (Electronic Toll Collection) Solution

Electronic Toll Collection (ETC) makes it possible for vehicles to drive through toll gates at traffic speed, reducing congestion at toll plazas and automating toll collection. Originally ETC systems were used to automate toll collection, but more recent innovations have used ETC to enforce congestion pricing through cordon zones in city centers and ETC lanes.

- Shahjahanpur Toll Plaza (STP):
  - ❖ The Toll Plaza has total of 18 lanes, extreme lanes are extra wide lanes.
  - ❖ Two lanes i.e. lane no. 2 and 17 are converted into Dedicated Hybrid ETC Lanes (DEL), where only the ETC transactions will be possible and only the vehicles with valid Tags will be able to cross through.
  - ❖ Both extra wide lanes i.e. lane no. 1 and 18 will be converted into Hybrid lanes, where both cash and ETC transaction will be processed.
